[Nancy Barbidge det.]

20-25/2/47.

Field Trip No. 17. — Victorian Alps.

16468. [E. cordieri] Cordiera (spec.) + strap like macrorhyncha (spec.) Phaul.

492. Below. 497 Eastern Range

520. Easty. 524. Strugg (major?) Brachycarna, A. pusilla

Araxilulus duplex 535: Comptoir. 539 Phaul. 531 Range. 652. Bright

1002ft.

28.85 hrs. 9.30 am. 656. Porepa (at pig)

28.96 " 9.45. 662.3. 1450. 28.45"

10.0 am 681. 24.34". 5645

Summit, Mt. Buffalo (The Horn). [E. pipheplilla]

12 noon. E. Conacea (?) glaucous- Percassa, Phaulacidium, A. vulgaris, leafed, mallee form, 5-8ft. with Koziniacola tristis restrictus(R) Poa, + emeral shrubs. Percassa (12.30 pm) at 24.45". A. vulgaris at 25.45.

682. 25.74" 2.25 pm Conacea A. vulgaris up to 12ft. with Poa + low shrubs. Swamp with Poa + shrubs only. Monotreia from 25.74 "to 25.80". Phaul. Monotreia viridosa lacrimaris(R), Koziniacola tristis restrictus(R)

Kosciuscola tristis restrictus (R), K. cuneatus (R)

Cryptobothrus 3.30 pm [E. niphophila]
16686. 26.02" / Coniacea sp. (spec.)
Phaulacridium vittatum
up to 30 ft., shrubs, Poa. Phaul

687. 26.32". 4 pm Dalrympleana
Percassa rigiflora
& Coniacea & part flora medium
Monotria viscosa lacrimans (R), Kosciuscola tristis
height forest with small &
restrictus (R), K. cuneatus (R)
medium shrubs & Poa; adjoining
swamp with Poa robusta.

Phaul. 689. 4500 ft peg / 26.16". 4.15 pm
alt. peg. ~ 3870 ft.
691. 26.64". 5 pm Tall Eucalypt
Percassa rigiflora
gigantea & Dalrympleana,
former predominant. Dense
undergrowth to 10 ft. of Daviesia
sp. & Acacia spp. little grass.
27.025" 5.30 pm
692. Dalrympleana, Robertsoni
& a euc. with rough basal
bark & very long streamers
(spec) Daviesia, Acacia &
Aeridids.

22/2. 709. Bright, 28.89": 9 am.
725. Harrietville. 28.175". 9.30 am.

On way up Mt. Hathetop. 25.44"
12 noon. Regrowth of gigantea
killed by fire. Monistria V. Summit
of Hathetop. 6303 ft. 23.74", 2pm.
Poa alpina head, some
Monistria virosa lacrymans (R)
Phaulinopsidium dilatatum, Koscinscola
usitatus (R)
P. nitatum "
23.74 – 23.80.
Koscinscola
usitatus (R).
Ditto 23.80" – 25.00". Ditto. "
usitatus (R)
pauciflora" to 2ft. immediately to
west. Gomphocarpus australasiae at
25.00". 25.00" – 25.13". Monistria
Cryptobothrus chrysopharus, Koscinscola
usitatus (R), K. tristis inter t. tristis + t. restrictus (R)
at 25.00. Pauciflora" 2–6ft, with
patches of Poa grassland with
shrubs resulting from clearing
a ski-run. K. tristis at 25.13"
25.13 – 25.53" "Pauciflora"
Cryptobothrus, A. vulgaris,
K. nitidiceps & Koscinscola
Monistria virosa lacrymans (R), Koscinscola tristis
inter t. tristis + t. restrictus (R)
sp. at 25.53". [Observed Phaul. sp.
on back of K. tristis ♀ being carried
about, attempting cop.]

Kosciuscola tristis inter t. tristis &
25.53" – ? (aneroid suggested). Pauciflora
t. restrictus (R), K. cuneatus (R)
to 12 ft. plus usual shrubs & Poa-
Same Percassa
and ferns section brings us to
full size trees including
Dalopogon pluma & gigantea in
gully. [Note: aneroid probably
defective. Between 25.53" & the
last reading, which was 25",
there was a considerably
drop in altitude. Also the
drop between the summit &
25.00 (first reading of this amt.
did not appear to be 1,300 ft.]
Reading on return to Bright: 28.80.

23/2. Trip to Hotham. 16742. Bright
778. 24.35" Kosciuscola usitatus (R),
25.85 10 am Summit of Hotham
K. tristis inter t. tristis & t. restrictus (R)
12.30: Poa-Celmisia. Other rare,
low spreading shrubs.
Monotoca viscosa lacrimans (R)
779. 24.72 2.0 pm "Pauciflora"
P. vittatum, Kosciuscola tristis inter t. tristis &
originally to ca. 10 ft., but burnt &
t. restrictus (R)

{Koscuscola cuneatus (R), K. tristis inter t. tristis + t. restrictus (R), K. tristis (R)

now showing regrowth to 5ft.
Usual shrubs, little Poa. Percassa
Monistria vinosa lacrimans (R)
Phaul 16781. 24.97. ~~Poa~~ 3/pm
[E. niphophila] Percassa rufifrons
Veg. same as last Phaul.
Monistria vinosa lacrimans (R), Koscuscola tristis (R),
782. 25.34. 3.30 pm. Veg. same
P. vittatum, K. tristis inter t. tristis + t. restrictus (R)
as last, but shrubs fewer.

784. 25.475". 3.30 pm Dargo-Hotham-
Bright road junction (get altitude)
Percassa Cryptobothrus,
Koscuscola cuneatus (R)
784. 25.65". 4 pm Quercus (40 ft.),
P. vittatum, Monistria vinosa lacrimans (R),
Koscuscola tristis inter t. tristis + t. restrictus (R)
Eucalyptus, Banksia, Acacia, Leptospermum,
Bonjeasp. (sparse)
shrubs & Poa. 787. 26.03". Gigantea
Percassa rufifrons
of good size (to 150ft.) with dense layer of
[Daviesia latifolia] Monistria vinosa lacrimans (R)
Daviesa sp. up to 6ft., other
Koscuscola tristis inter t. tristis + t. restrictus (R)
herbs, little Poa. Sample 1 from
K. cuneatus (R) (Monistrigonia)
undamaged forest, sample 2
from burnt forest with regrowth
of a few years (to 12ft).
Phaul. 813. Bright. 28.70.
24/2 Trip to lower levels of Buffalo.
813. Bright. 832. 26.04". alt. reg

Daviesia, various other shrubs,
occ. Poa & bracken. Phaul.
838. Alt. peg. 2550 ft. 27.58"
Return to Bright. 850. Bright 28.83"
Return to Buffalo. 863. Alt. peg.
2550 ft. 27.57". 864. 27.75". Viminalis
Robertsonii, maculosa in & around

Percassa
Salty with salty vegetation, bee ferns, other ferns, bracken, some Poa. 16865. 28.06". Macrorhynchus Cordieri + ribbon sp. with large fruits collected earlier. Phaul Macrotona. Shrubs numerous to 10ft. 866. 28.42". Dunes, macrorhynchus Gastrimargus, Macrotona australis, Exarma, Cordieri, maculosa, Robertsoni, Praecibulus, P. vittatum numerous shrubs to 5ft. including Daviesia, also shorter typical dot shrubs, Poa, Themeda, some bracken. 867. 28.75". 4pm. E. ovata? Praecibulus ~~carnicki~~ duplex (R) on narrow floodplain of creek. Robertsoni Fulminalis nearer to water, Robertsoni also further away, up the slope. Gastrimargus. ~~Scrub~~ Cyperaceae, coarse + short grass, some tall Myrtaceous + Acacia shrubs. 871. Cleared completely, but with

extensive regrowth of wattles & Myrtaceae along road; also paddocks completely dominated by Hypericum, otherwise with fairly dense short pasture. 28.92".

Phaul. Gastrimargus, Acrida.

16872. Porepunkah. 875. Bright. 28.80". 4.30 pm.

NB. The above aneroid readings have been very carefully checked against known altitudes, using pressure readings, corrected to sea level, from Hotham Heights, & Buffalo. They are found to be quite irregular, with errors amounting in one case to as much as 1000 ft. This was as true of the 23rd. & 24th. when great care was taken in making the readings,

as it was for the 21st. & 22nd.
